

KG Akshay Hebbar

Applied AI Solutions Architect · Enterprise Platform Architect

Solutions architect with nearly 10 years of experience helping enterprises modernize developer platforms, adopt cloud-native architectures, and introduce AI safely into business workflows. Strong at translating complex requirements into secure, scalable solutions and communicating with engineers, leaders, and cross-functional stakeholders.

PROFESSIONAL EXPERIENCE

Applied AI & Enterprise Enablement — BT Group

2023 – Present · Recent focus within current role

- Designed and developed 3 Jira and 4 Confluence applications, estimated to save more than 150,000 hours of work annually.
- Built AI-assisted workflows using Atlassian Rovo, Amazon Q and modern LLM integration patterns.
- Trained multiple engineering teams to use AI effectively for software delivery, operations and knowledge work.
- Authored practical AI guardrails covering safe usage, data handling, human review, security and responsible adoption.
- Advised teams on where AI adds value, where deterministic automation is preferable, and how to balance speed, reliability and risk.

Consultant / Tools Architect — BT Group

June 2019 – Present · Enterprise platforms, cloud architecture and applied AI

- Lead architecture across three engineering teams delivering developer platforms and services used by more than 10,000 enterprise users.
- Partner with engineering leaders and stakeholders to convert business needs into secure, scalable architectures across AWS, Azure, Kubernetes and Atlassian platforms.
- Designed and developed a standalone middleware layer connecting multiple DevOps products, standardising integrations and enabling unified self-service workflows.
- Designed and built **DevOps Hub**, a Microsoft Teams application that centralises access requests, audits, pull-request management, CI/CD status and common platform operations.
- Created Python and PowerShell automation that eliminated more than 600,000 hours of manual work.
- Led migrations of mission-critical developer platforms from on-premises infrastructure to cloud-native AWS and Kubernetes environments.

Assistant System Engineer — Tata Consultancy Services

October 2016 – June 2019 · Cloud foundations and DevOps automation

- Designed Azure infrastructure and delivery automation using ARM, Terraform and Azure DevOps.
- Migrated enterprise workloads from IaaS to PaaS and implemented CI/CD pipelines for faster, repeatable delivery.
- Developed cross-region and cross-subscription automation, disaster recovery patterns, monitoring and cloud-security controls.

SELECTED SOLUTIONS

DevOps Hub

Self-service Teams app for access, audit, PRs & CI/CD

Integration Middleware

Reusable API layer connecting DevOps tools

Atlassian Apps

7 Jira/Confluence apps for productivity & AI

API Studio

Design-first API platform for teams

Lens

Chrome extension for screenshots, GIFs & step guides

Vectored.dev Tools

Developer productivity & automation suite

CORE CAPABILITIES

Applied AI

- LLM Integration
- Prompt Engineering
- AI Guardrails
- AI Enablement
- Atlassian Rovo
- Amazon Q
- Claude
- Kiro
- MCP

Architecture & Cloud

- AWS
- Azure
- Kubernetes
- Terraform
- Microservices
- Cloud Security
- System Design
- Tools Design
- Architecture

Engineering

- Python
- TypeScript
- Node.js
- PowerShell
- REST APIs
- CI/CD
- OAuth/OIDC

Customer & Leadership

- Technical Discovery
- Architecture Reviews
- Workshops
- Stakeholder Management
- Team Mentoring

CERTIFICATIONS

SAFe® 6 Agilist

SAFe® RTE

Azure Solutions Architect Expert — AZ-303, AZ-304

Azure Security Engineer — AZ-500

Azure Developer Associate — AZ-204

Azure Administrator Associate — AZ-104

Azure Fundamentals — AZ-900

EDUCATION

Bachelor of Engineering, Mechanical Engineering
Visvesvaraya Technological University
JNN College of Engineering, Shivamogga · 2016
